International Finance Facility for Immunisation – Aa1 stable

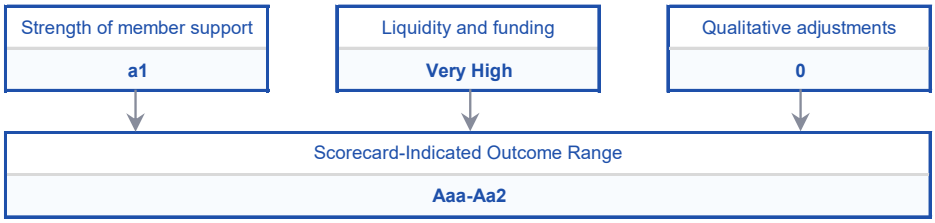

Regular update

Summary

The credit profile of International Finance Facility for Immunisation (IFFIm) reflects its very high liquidity and strong commitment from donor governments. The International Bank for Reconstruction and Development's (IBRD, Aaa stable) role as treasury manager of IFFIm's investment portfolio and its strong access to financial markets to issue bonds are credit strengths. These strengths offset vulnerabilities from the high concentration of donor pledges and credit risk from its largest donors: the Government of United Kingdom (Aa3 stable), Norway (Aaa stable), Italy (Baa2 stable), and Netherlands (Aaa stable).

Exhibit 1

IFFIm's credit profile is determined by two factors

Source: Moody's Ratings

Credit strengths

» Strong commitment from donor governments to support programs financed by IFFIm

» Strong gearing and liquidity positions, and strong risk management policies

Credit challenges

» Concentration of donor pledges and somewhat high correlation in credit risk among the largest donors

» Significant reductions in donor payments in the unlikely event that a large number of recipient countries go into arrears with the International Monetary Fund (IMF)

Rating outlook

The stable outlook reflects our view that IFFIm's credit profile will remain aligned with other Aa1 supranationals and that downside risks are limited and effectively mitigated. Although concentration of donor pledges poses challenges, risks are mitigated by the strong commitment of all donors and a gradual diversification of outstanding and expected future pledges that will lower the dependence on a single donor's rating.

Factors that could lead to an upgrade

Positive credit pressure would emerge if the creditworthiness of IFFIm's largest non-Aaa rated donors improve substantially. A significant decrease in the concentration of donor pledges would also be credit positive.

Factors that could lead to a downgrade

A deterioration in the creditworthiness of IFFIm's donors or also a reduction in donor support not compensated by other donors with similar or stronger credit quality could lead to a downgrade of its rating. A weakening of risk management practices or a significant increase in leverage would also strain the rating.

Profile

The International Finance Facility for Immunisation (IFFIm) is a multilateral development institution created in 2006 as a financing tool to accelerate and facilitate funding for immunizations carried out by Gavi, the Vaccine Alliance (Gavi)[1], and thereby help the international community in achieving the United Nations' (UN) Sustainable Development Goals. IFFIm serves as an additional funding vehicle for Gavi-approved programs and does not have any operations other than providing grants to finance Gavi programs in lower-income countries. IFFIm has no employees and therefore receives administrative support from Gavi. Moreover, the IBRD, as treasury manager, conducts IFFIm's financial affairs, including risk management. The role of the IBRD as treasury manager is a significant source of credit strength for IFFIm. The financial and institutional strength of the IBRD allows it to provide innovative risk management solutions, which ultimately benefit IFFIm. IFFIm is incorporated as a private company, registered as a charity in England and Wales, and is governed by its own board of directors.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on https://ratings.moodys.com for the most updated credit rating action information and rating history.

Detailed credit considerations

Our determination of a supranational's rating is based on three rating factors: solvency, liquidity and funding, and strength of member support. For certain type of supranational entities like IFFIm, strength of member support is the key driver of our assessment of the institution's credit profile, as shown on the cover page graphic. Additional considerations on liquidity and funding, and other qualitative adjustments, including risks stemming from the operating environment or the quality of management, are incorporated to provide the rating range. For more information please see our Multilateral Financial Institutions Rating Methodology.

FACTOR 1: Strength of member support score: a1

We assess IFFIm's strength of member support score at "a1". Pledges from donor countries are legal obligations, and most of the pledged support from IFFIm comes from donors with both high credit ratings and track record of strong commitment to support IFFIm's mission. The score also reflects incoming pledges that illustrate continued donor support for IFFIm as a key funding mechanism for Gavi (the Vaccine Alliance, Gavi). Our final assessment of strength of member support balances the donors' ability and willingness to honor pledges with risks stemming from the concentration of IFFIm's donor structure, as the UK remains a major contributor.

Ability to honor pledges remains very strong despite concentration risk

While IFFIm does not have paid-in or callable capital, sovereign donor commitments represent legally binding and enforceable payment obligations. Given the legal characteristics of these pledges, we regard them as analogous to capital contributions. Under our MFI methodology, member support is evaluated through both ordinary and extraordinary support. Because IFFIm lacks callable capital, extraordinary support is not applicable, and our assessment is therefore derived solely from ordinary support.

For most supranationals, the strength of member support is anchored in shareholders' capital contributions, with the ability to provide support measured through the weighted average shareholder rating (WASR). For IFFIm, we apply the same framework using sovereign donor commitments as the relevant support metric. On this basis, we calculate a WASR of Aa3.

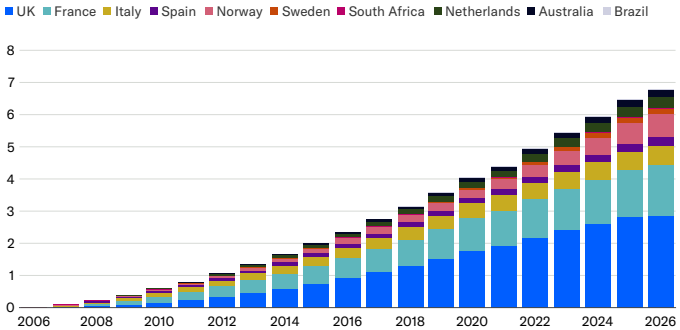

At its inception, IFFIm had six original donors: the UK, Norway, France, Italy (Baa2 stable), Spain (A3 stable) and Sweden (Aaa stable). Since then, donors have increased their pledges and Australia (Aaa stable) Canada (Aaa stable), Netherlands (Aaa stable), Brazil (Ba1 stable) and South Africa (Ba2 positive) joined IFFIm.

The coronavirus pandemic led donors to step up their efforts in the 2021-2025 funding cycle after several years of limited additional pledges - showing strong willingness to support. Since 2020, new pledges amounted to $3.1 billion with the UK (40%), and Norway (24%) being the largest contributors. In 2020-24 funds received from pledges averaged $475 million per year, while in 2025-29 the expected receipts from pledged amounts will likely rise to around $530 million per year, on average.

Exhibit 3

The pandemic has led to an uptick in donor contribution

Exhibit 4

Remaining pledges are concentrated in Aaa and Aa3 sovereigns

Sovereign pledges by ratings (as of August 2026)

Source: IFFIm

Willingness to honor pledges supported by effective delivery of IFFIm's mandate

The ordinary support score also considers the institution's track record of support and policy relevance, which indicate shareholders' demonstrated willingness to support the MFI and the institution's strategic importance to them. Policy relevance is underpinned by the

close alignment of the institution's mandate with shareholders' policy priorities. We assess IFFIm's track record of support and policy relevance as "High".

Regional MFIs, as enactors of economic public policy, are often of strong economic importance to their sovereign members. This is not the case for IFFIm because all immunization programs under Gavi are located exclusively in non-donor countries. Therefore, the importance to the donors rests on the importance of the mandate and IFFIm's ability to help Gavi fulfill that mandate. Donors' commitment to the scheme is strong; in some cases, they have opted to disburse the full amount under the pledge agreement even when not required to do so. In accordance with the pledge agreements, donors may withhold a portion of their pledge disbursements if beneficiaries are in arrears with the IMF. In 2020, donors were allowed to withhold 0.5% to 1.5% of pledges, but one donor, Norway, decided to make the full disbursement. Donor commitments are also legally binding and represent a credit obligation of the sovereign, and failure to honor those commitments would expose the sovereign to legal challenges.

Gavi and the financing provided through IFFIm are an integral part of delivering on the UN's Sustainable Development Goals. The likelihood that a donor would abandon these goals once they have committed is very low.

FACTOR 2: Liquidity and funding score: Very High

We assess IFFIm's liquidity and funding at "Very High," reflecting a prudent liquidity policy, the role of the IBRD as treasury manager of its investment portfolio and its strong access to the financial markets to issue bonds.

Liquidity policy ensures ample coverage of upcoming financial obligations

IFFim's liquidity policy aims to ensure an adequate level of liquid assets to meet its operational requirement, provide predictability of program funding and support its credit rating. To this end, the policy sets a prudential minimum level of liquidity equivalent to IFFIm's cumulative contracted debt-service payments for the next 12 months, in line with the liquidity policies of other highly rated supranationals.

The treasury management recalculates and resets the prudential minimum every quarter. We consider this policy to be very strong because it ensures the ability to service debt for one year in the unlikely event that IFFIm loses market access and is unable to roll over maturing debt. IFFIm has consistently held more liquid assets than the prudential minimum set by the policy. As of 31 December 2025, the calculated minimum liquidity requirement was approximately $1.1 billion (2024: $925 million), while liquid assets held in trust amounted to approximately $1.5 billion (2024: $1.5 billion), providing a substantial buffer above the policy minimum.

Funds held in trust increased modestly to $1.518 billion at year-end 2025 from $1.492 billion a year earlier. The increase reflected bond issuance proceeds, grantor payments, net swap settlement receipts, and investment income, which more than offset programme grant disbursements, bond redemptions, interest payments, and other operating expenses.

World Bank involvement in treasury operations provides institutional strength

The IBRD carries out IFFIm's financial management function under rules set forth in the Treasury Management Agreement. Therefore, there is active management of cash flow, investments and disbursements by a strong institution with a long track record.

The IBRD's financial management is very strong, a factor driving its own Aaa rating and a strong supporting factor for IFFIm's Aa1 rating. The IBRD's involvement in establishing and managing IFFIm's gearing ratio, liquidity policy and debt maturity structure offers confidence that debt repayments will be made on time. The treasury manager has the flexibility in delaying commitments and disbursements for programs to remain within the desired gearing ratio and maintain liquidity, according to the established policy. Furthermore, it has, perhaps more than any other organisation, an understanding of the credit quality of recipient countries. Therefore, it will be able to adjust IFFIm's financial metrics in advance in the event of a reduction in donors' scheduled payments, as a result of recipient countries going into arrears with the IMF, to safeguard IFFIm's debt repayment capacity.

As IFFIm's treasury manager, the IBRD carries out the entity's asset and liability management, namely the management of IFFIm's market risk stemming from foreign-exchange rate and interest rate risks. Almost all sovereign pledges are denominated in local currency and not in US dollars, and some outstanding bonds are denominated in other currencies. In addition, interest rate fluctuations can affect the value of sovereign pledges and bonds. To hedge against interest rate and exchange rate risks, IFFIm enters into US dollar floating-rate swaps. Counterparty risk is low because the swap contracts are mainly with the IBRD.

The treasury manager invests liquid assets on IFFIm's behalf according to the following very conservative guidelines, similar to the IBRD's own guidelines, and the goal of which is to preserve capital rather than generate earnings:

» Money market instruments must be issued or guaranteed by financial institutions rated A3 or higher

» Foreign-currency government and agency obligations must be rated Aa3 or higher

» Local-currency government obligations carry no rating minimum, but are subject to credit approval on a country-by-country basis

» Agency or debt instrument of a government, multilateral organization or other official entity must be rated Aa3 or higher

» Asset-backed securities must be rated Aaa

» Corporate securities must be rated Aaa

Market funding access is high because of a diversified investor base

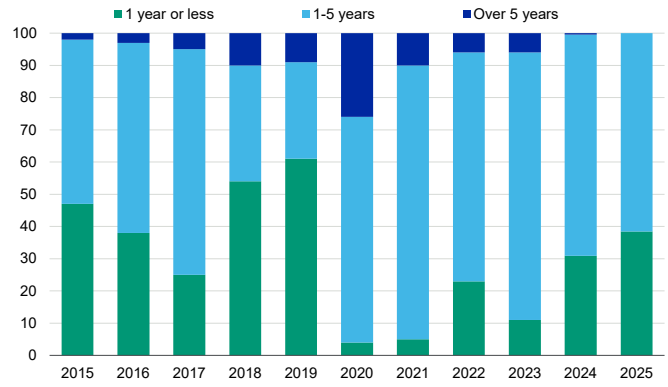

IFFIm's borrowing program can be characterized as diversified despite being modest in size. Bonds are issued in four markets: Japan (A1 stable), the UK, Australia and the eurobond market. IFFIm has also entered the sukuk market, securing a total of $750 million over three issues (2014, 2015 and 2019). Because of its global funding base, and to hedge currency and interest rate risk, all bonds are swapped at issuance into US dollar floating rate.

IFFIm's infrequent market issuance has resulted in some volatility in its maturity profile over the years. IFFIm did not access the market very much in the two years preceding the pandemic but has returned to the market since 2020 to refinance maturing debt as well as in response to the uptick in sovereign pledges. IFFIm has issued over $4 billion since 2021 and considerably reduced near-term refinancing risks. In 2025, IFFIm issued a $250 million bond in April and a GBP 300 million bond in June using part of the proceeds to refinance three bonds maturing during the year and the remainder was disbursed to Gavi. In 2026, IFFIm returned to market with a $1 billion 5-year bond.

Source: IFFIm

Despite having a sovereign donor base that is mainly European, including several euro area members, IFFIm has been able to maintain its very low borrowing rates in recent years. Unlike Europe-based multilateral financial institutions (MFIs), IFFIm's borrowing costs were not stressed at the height of the European debt crisis. This can be largely attributed to the reputational benefits of having the IBRD as its treasury manager. Any disruption to IFFIm's market access is unlikely, but the liquidity policy discussed above provides additional protection for bondholders.

Other elements related to intrinsic financial strength

Pledges remain substantial compared with outstanding debt

As a measure of the sustainability of IFFIm's finances, we can compare IFFIm's outstanding debt to the value of the remaining pledges. Because we consider donor obligations as analogous to capital contributions in MFIs, this yields a ratio analogous to the callable capital-to-total debt ratio. In the specific case of IFFIm, we consider the nominal value of the donors' remaining pledges as a measure of callable capital. As of year-end 2025, IFFIm compared favorably with most of our rating universe, including other highly rated MDBs.

IFFIm uses a similar metric to ensure its financial sustainability. IFFIm's treasury manager has set a limit on its debt stock using a gearing ratio, defined as total debt net of cash holdings (that is, net debt) over the present value of donor pledges. As of year-end 2025, IFFIm's gearing ratio was 58.4%, compared with 57.7% a year earlier, remaining comfortably below the 76.2% gearing ratio limit established by the Gearing Ratio Limit (GRL) model.

Throughout IFFIm's existence, the observed gearing ratio has remained well below its limit. At the start, the ratio rose as IFFIm issued debt and disbursed funds to Gavi. After 2013, the ratio started decreasing as a result of a slowdown in debt issuance, a steady stream of pledges and limited disbursements to Gavi. The ratio started to rise again from 2020, in line with the increased debt issuance.

Qualitative adjustments to intrinsic financial strength

We do not apply qualitative adjustments related to the operating environment or the quality of management in our assessment of IFFIm's credit profile.

ESG considerations

How environmental, social and governance risks inform our credit analysis of IFFIm

Moody's takes account of the impact of environmental (E), social (S) and governance (G) factors when assessing supranational issuers' credit profile. In the case of IFFIm, the materiality of ESG to the credit profile is as follows:

Environmental considerations are not material for IFFIm's ratings given its mandate to channel donor funding to Gavi.

Social considerations are relevant for IFFIm's ratings given its mandate to channel donor funding to accelerate vaccination by Gavi, which has played an important role in expanding vaccination against the coronavirus to low-income countries, and will likely continue to play a similarly-important role in future health crises.

Governance considerations are material for IFFIm's credit profile, given relatively concentrated donor pledges, with the UK, Norway and Netherlands accounting for 68% of pledges. This introduces risk to the weighted average donor rating, especially as some of IFFIm's largest donors have experienced negative credit pressures in recent years. The role of the IBRD in risk management is also material for IFFIm's credit profile in mitigating risks.

All of these considerations are further discussed in the "Detailed credit considerations" section above. Our approach to ESG is explained in our cross-sector methodology General Principles for Assessing Environmental, Social and Governance Risks. Additional information about our rating approach is provided in our Multinational Financial Institutions Rating Methodology.

Recent developments

IFFIm returned to the market with $1 billion bond issuance

In April 2026, IFFIm issued $1 billion of 5-year fixed-rate Vaccine Bonds, with proceeds supporting Gavi, the Vaccine Alliance's (Gavi) immunization programs in lower-income countries. The transaction, which matures in April 2031 and carries a 4% coupon, demonstrates IFFIm's continued access to international capital markets and its ability to leverage long-term donor pledges to provide immediate funding for vaccine and health-system initiatives.

New Funding Cycle begins in 2026 during challenging period for official development aid

IFFIm entered its new funding cycle in 2026 against a backdrop of increasing pressure on official development assistance, as several donor countries reassessed or reduced aid commitments across a range of global initiatives. During Gavi's June 2025 replenishment conference for the 2026-2030 strategic period, donors pledged $9 billion toward an overall funding target of $11.9 billion. Five existing IFFIm donors, excluding France, subsequently confirmed approximately $800 million in new commitments to the facility. Discussions

with existing and prospective donors remain ongoing and could result in additional pledges over time. Continued diversification of donor commitments would reduce IFFIm's reliance on any single donor and strengthen the overall credit profile of its pledge portfolio.

As of September 2026, IFFIm's long-term cumulative donor pledges totaled around $9 billion. In 2026, the UK, IFFIm's largest donor, reprofiled the payment schedules associated with its 2020 and 2022 grant agreements, extending a portion of pledged payments through 2035. The revised structure was accompanied by a new £300 million grant agreement payable between 2030 and 2035 preserving the overall level of pledges from the UK even in net present value terms. By lengthening the maturity profile of donor receivables while preserving the overall level of commitments, the optimization enhances IFFIm's ability to front-load funding through Vaccine Bond issuance, supports funding flexibility for Gavi's 2026-2030 strategy, and extends the period over which pledged cash flows are available to support the institution's financing model.

Note: Our ratings are forward-looking and reflect our expectations for future financial and operating performance. However, historical results are helpful in understanding patterns and trends of an issuer's performance as well as for peer comparisons. Additional considerations that may not be captured when historical metrics are used in the scorecard may be reflected in differences between the adjusted and assigned factor scores. Furthermore, in our ratings we often incorporate directional views of risks and mitigants in a qualitative way. This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.
Additional terms for India only: Moody's credit ratings, Assessments, other opinions and Materials are not intended to be and shall not be relied upon or used by any users located in India in relation to securities listed or proposed to be listed on Indian stock exchanges.
Additional terms with respect to Second Party Opinions and Net Zero Assessments (as defined in Moody's Ratings Rating Symbols and Definitions): Please note that neither a Second Party Opinion ("SPO") nor a Net Zero Assessment ("NZA") is a "credit rating". The issuance of SPOs and NZAs is not a regulated activity in many jurisdictions, including Singapore. EU: In the European Union, each of Moody's Deutschland GmbH and Moody's France SAS provide services as an external reviewer in accordance with the applicable requirements of the EU Green Bond Regulation. JAPAN: In Japan, development and provision of SPOs and NZAs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used

within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
